

Reconstituting Antibiotic Diagram

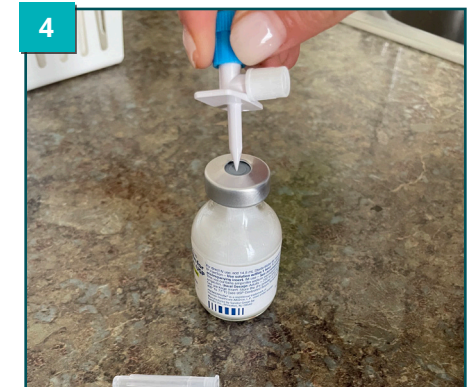

1 Wash hands.

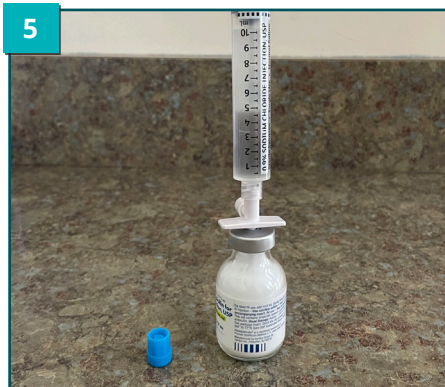

2 Gather supplies.

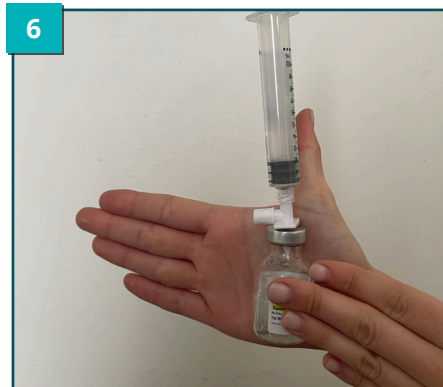

3 Remove cap and clean top with alcohol prep.

4 Spike antibiotic powder and remove cap.

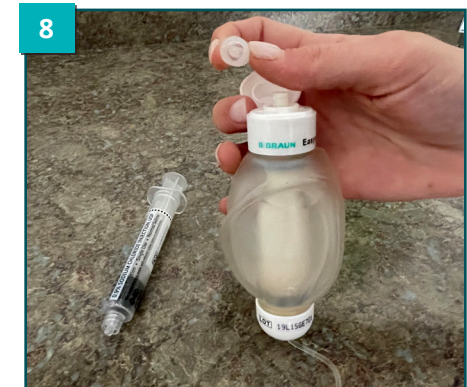

5 Add normal saline syringe to antibiotic.

6 Mix until powder dissolved.

7 Draw mixed antibiotic into syringe.

8 Add mixed antibiotic to accuflow or eclipse ball. Replace cap.

You're now ready to attach the line to your picc or port and open the clamp. The infusion will start.
